Suhani Kumari

AI/ML Engineer — Full-Stack Developer — HPC

+91 93044 84296 — suhanimehta.anu@gmail.com — LinkedIn — GitHub — Portfolio

Professional Summary

AI/ML Engineer and Full-Stack Developer pursuing MCA at IIT Patna (Hybrid) with ongoing High Performance Computing (HPC) training at C-DAC. Hands-on experience in machine learning, NLP, computer vision, audio intelligence, data analytics, and MERN-stack development. Proficient in Python, C/C++, Java, JavaScript, Linux, TensorFlow, PyTorch, Scikit-learn, and REST APIs.

Education

Indian Institute of Technology Patna (IIT Patna) **2026 – Present**
Master of Computer Applications (MCA)

Bachelor of Computer Applications (BCA) **2023 – 2026**
CGPA: **9.08/10.0**

Experience

C-DAC **2026 – Present**
HPC Trainee – High Performance Computing Program

- Undergoing specialized training in **High Performance Computing (HPC)**, parallel computing, Linux, system optimization, and scalable computation.

C-DAC **Dec 2025 – Feb 2026**
OJT Trainee – Applied AI & System Development

- Developed AI-powered audio intelligence pipelines using feature extraction, speaker embeddings, and clustering for speaker identification.
- Built audio processing workflows and integrated ML models into backend microservices for automated processing.

Infosys Springboard **Nov 2025 – Jan 2026**
Python Intern

- Processed smartwatch health data using Python, Pandas, and NumPy with data cleaning, normalization, and feature extraction.
- Applied machine learning and anomaly detection to identify unusual health and activity patterns.

IBM CSRBox **Jul 2025 – Aug 2025**
Data Analytics Intern

- Performed data cleaning, transformation, EDA, visualization, and dashboard development on real-world datasets.

InternNexus **May 2025 – Jun 2025**
MERN Stack Intern

- Developed full-stack applications using MongoDB, Express.js, React.js, and Node.js; built REST APIs with JWT authentication and RBAC.

Technical Skills

Languages: Python, C, C++, Java, JavaScript
HPC & Systems: High Performance Computing, Parallel Computing, Linux, System Optimization
AI/ML: Machine Learning, NLP, Computer Vision, TensorFlow, PyTorch, Scikit-learn, Speaker Diarization, Anomaly Detection
Web: HTML, CSS, React.js, Node.js, Express.js, REST APIs, MERN Stack
Databases: MongoDB, MySQL
Tools: Git, Linux, Arduino

Projects

Speaker Diarization & Time-Stamping GitHub *Python, PyTorch, Librosa, Scikit-learn*

- Built an audio intelligence pipeline using speaker embeddings and clustering to identify multiple speakers and generate timestamped diarization outputs.

FitPulse – Health Analytics & Anomaly Detection GitHub *Python, Scikit-learn, Pandas, NumPy*

- Developed a fitness monitoring system with preprocessing, feature engineering, and real-time anomaly detection for sensor and activity data.

MediCare – Healthcare Management Dashboard GitHub *MongoDB, Express.js, React.js, Node.js*

- Developed Admin, Doctor, and Patient portals with JWT authentication, appointment scheduling, medical records, and role-based access control.

Certifications & Achievements

Certifications: Full-Stack Web Development & AI – Pantech Solutions; Java Programming – Geekster; Cybersecurity – NIELIT; Agentic AI – IBM SkillsBuild.
Achievements: Winner – TECH-CURE Hackathon, Patna Women's College; Finalist – Eco-Hackathon, IIT BHU.
